

## Office of Economic Analysis

**Scott Harra, Director**

# Oregon Corrections Population Forecast April 2008

**Volume XIV No. 1**

### Forecast Highlights

The prison population was 13,405 on January 1, 2008, having grown by 0.7 percent (98 beds) during 2007. The prison population is expected to grow at a slightly faster rate during 2008. The January 1, 2009 population is expected to be 13,722, which is 2.4 percent (317 beds) higher than January 1, 2008.

The rate of growth in the prison population has been gradually slowing. Comparing biennial growth rates shows that the population grew by 15.7 percent in the 1999-01 biennium, 12.2 percent in 2001-03, 7.3 percent in 2003-05, and 4.9 percent in 2005-07<sup>1</sup>. Growth in the current biennium is expected to be 2.2 percent (296 beds), while 4.3 percent growth (596 beds) is expected for the following biennium (2009-11). The population is expected to reach 14,400 by July 1, 2011.

Prison population growth has been driven by mandatory minimum sentences for certain violent offenders (Measure 11 - ORS 137.700), and by increasing intakes of repeat property offenders (RPOs - ORS 137.717).

The felony probation caseload was 20,294 on October 1, 2007, having declined by 0.9% percent (185 cases) since April 2007. The probation caseload is expected to grow

---

<sup>1</sup> Oregon's fiscal year extends from July 1 to June 30<sup>th</sup>. Biennial budget periods extend from July 1 to June 30<sup>th</sup> of odd-numbered years.

### Background

The Corrections Population Forecast is produced semi-annually by the Office of Economic Analysis (OEA) and the Corrections Population Forecast Advisory Committee.

The forecast covers State-funded correctional populations: prison, felony probation, parole and post-prison supervision, and felons serving local sentences of 12 or fewer months (*Local Control*). The forecast is used to develop the budget for the Oregon Department of Corrections.

OEA uses a *flow model* to forecast correctional populations. The model simulates the flow of offenders through the criminal justice system from arrest through prosecution, sentencing, release, and revocation. The correctional population forecasts are inter-related. The forecast is based on offender data from the Corrections Information System (CIS).

The annual methodology review provides detailed information on how these forecasts are produced. It is available at our website, <http://oregon.gov/DAS/OEA/>.

Of special note, this April 2008 forecast is an extension of the October 2007 forecast. The Office of Economic Analysis is in the process of filling the vacant position of Correction Forecast Analyst. Actual caseload has been added and then forecasted out using the underlying trends from the October 2007 forecast. Given the close tracking of the past forecasts, this method was chosen for this transition period. The October 2008 forecast will return to the methodology used in the previous forecasts.

by 6.3 percent (1,272 cases) to 21,566 by July 2009, the end of the current biennium. It is expected to grow another 3.9 percent (846 cases) during the 2009-11 biennium, reaching 22,412 by July 2011.

The parole and post prison supervision caseload was 13,752 on October 1, 2007, having grown by 0.5 percent (62 cases) since April 2007. It is expected to increase by 0.4 percent (58 cases) by July 2009, reaching 13,810 at the end of the biennium.

The Local Control population was 1,131 on October 1, 2007. It is expected grow by a further 11.0 percent (128 beds) during the 2007-09 biennium, reaching 1,259 by July 1, 2009.

### **Key Assumptions**

This forecast is based on current law, policy, and practice. The most critical assumptions underlying the forecast are listed below.

- Prison intakes will grow slightly in FY 2008 and 2009. An increase in RPO and other non-Measure 11 intakes will account for most of this growth.
- Although arrest rates will fluctuate during the forecast period, the average will be close to the 2005 arrest rate.
- Sentencing practices typical of 2006 and 2007 will continue over the forecast period.
- Institutional and community corrections policies typical of FY 2006 and 2007 will continue over the forecast period. These include the Alternative Incarceration Program and policies regarding earned time

credit awards, revocation and sanctions

### **Forecast Risk**

Changes to Oregon's sentencing laws, whether through the legislative process, ballot measure, or judicial ruling pose major risk to the forecast. Law changes affecting prison sentence length or disposition (i.e. prison vs. probation) can have immediate and substantial effects on correctional populations.

The citizen Initiative Petition 40 has been submitted for approval for the November 2008 electoral Ballot. This initiative would substantially increase penalties for certain property crimes. No official estimate of the initiative's impact has been developed, but it is likely that Initiative 40 would cause a significant increase in the prison population. The initiative would increase the length of some prison sentences and cause more offenders to be sentenced to prison rather than probation.

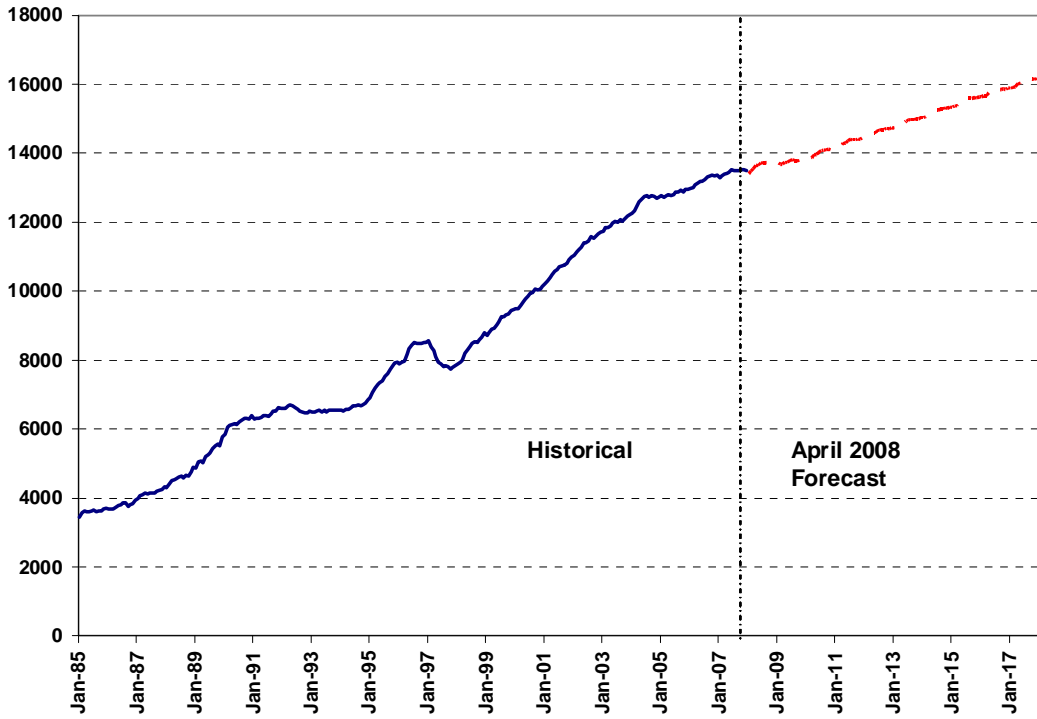

Similarly initiatives 131, increasing the sentences for specified repeat sex and driving under the influence of intoxicants crimes, and 132, restricting the early release of felons, pose a potential risk to this forecast.

Senate Bill 1087 may also have an impact on this forecast if approved by the people of Oregon at the next general election and if it receives a greater number of votes than IP40. The effect would be to increase the term of imprisonment for those convicted of certain drug trafficking crimes, as well as specified repeat property and identity theft crimes committed on or after January 1<sup>st</sup> 2009. We will continue to monitor potential legislative risks to the forecast.

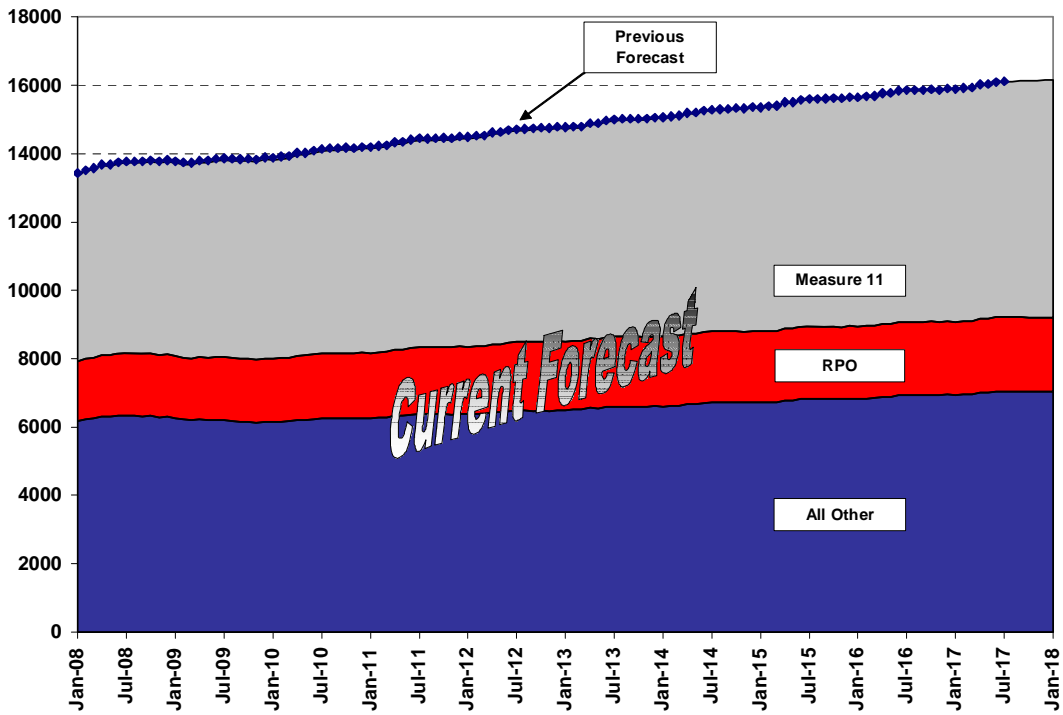

Budgeted resources of the state and local governments also can affect practices regarding felony offenders. As an example, community corrections caseloads were significantly affected by budgetary constraints to the court system in 2003. Budgetary changes and constraints are an ongoing forecast risk.

Finally, crime trends change over time. As law enforcement and prosecution adapt to changing crime trends, a different mix of felony offenders can result. Such changes could affect the corrections population in ways we cannot foresee at present. Incorporating conjecture about possible future changes to the criminal justice system into the forecast does not reduce uncertainty. Therefore, the forecast is based on current law, policy, and practice.

**Figure 1: Historical and Forecast Prison Population**

**Figure 2: Current vs. Previous Prison Population Forecasts**

## Forecast Detail

Figure 1 shows the historical and forecast prison population. Figure 2 compares the current and previous forecasts. Table 1 shows the forecast for all inmates, and Table 2 shows intake growth rates.

**Table 1: Prison Population Forecast**

Date	Current	Previous	Diff.	Pct Diff.
Jan-08	13,405	13,434	-29	-0.2%
Jul-08	13,728	13,769	-41	-0.3%
Jul-09	13,804	13,864	-60	-0.4%
Jul-10	14,073	14,131	-58	-0.4%
Jul-11	14,400	14,454	-54	-0.4%
Jul-12	14,666	14,714	-48	-0.3%
Jul-13	14,967	15,003	-36	-0.2%
Jul-14	15,257	15,283	-26	-0.2%
Jul-15	15,589	15,608	-19	-0.1%
Jul-16	15,846	15,860	-14	-0.1%
Jul-17	16,108	16,118	-10	-0.1%
Jan-18	16,160			
Total Growth	2,755	20.6%		

Table 1 shows there is little difference in the two forecasts through the end of this biennium and beyond. This is because the intake forecast for these years has remained constant. Lower growth in RPO and M11 intakes are expected.

**Table 2: Prison Intake Growth**

FY	No. Intakes	Gr. Rate
2006	5,095	
2007	5,031	-1.3%
2008	5,182	3.0%
2009	5,307	2.4%
2010	5,431	2.3%
2011	5,525	1.7%
2012	5,614	1.6%
2013	5,702	1.6%
2014	5,789	1.5%
2015	5,870	1.4%
2016	5,948	1.3%
2017	6,025	1.3%

Forecast begins FY 2008

Tables 3 and 4 show the forecasts for two major components of the prison population, Measure 11 and Repeat Property Offenders. Table 5 shows the forecast for all other inmates.

**Table 3: Measure 11 Population Forecast**

Date	Population	Date	Population
Jan-08	5,475	Jul-13	6,330
Jul-08	5,563	Jul-14	6,465
Jul-09	5,753	Jul-15	6,650
Jul-10	5,925	Jul-16	6,769
Jul-11	6,065	Jul-17	6,888
Jul-12	6,178	Jan-18	6,969
Total Growth	1,494	27.3%	

**Table 4: RPO Population Forecast**

Date	Population	Date	Population
Jan-08	1,764	Jul-13	2,052
Jul-08	1,834	Jul-14	2,086
Jul-09	1,848	Jul-15	2,117
Jul-10	1,907	Jul-16	2,147
Jul-11	1,960	Jul-17	2,179
Jul-12	2,013	Jan-18	2,148
Total Growth	384	21.8%	

**Table 5: All Other Inmates Population Forecast**

Date	Population	Date	Population
Jan-08	6,166	Jul-13	6,585
Jul-08	6,331	Jul-14	6,706
Jul-09	6,203	Jul-15	6,822
Jul-10	6,241	Jul-16	6,929
Jul-11	6,375	Jul-17	7,041
Jul-12	6,475	Jan-18	7,043
Total Growth	877	14.2%	

Table 6 shows the *impact* of Measure 11 on the prison population. This law impacts the population in two ways. Direct impact derives from the increased sentence lengths for inmates convicted of crimes listed in ORS 137.700. Indirect impact is the result of increased intakes for crimes similar to those covered by Measure 11. These *Measure 11-related* crimes are lesser degrees or attempts. For example, Assault I is a Measure 11 crime. Attempted Assault I and Assault III are Measure 11-related crimes.

population. Slowing growth in the prison population eventually translates into slowing growth in the parole/post prison supervision caseload. The increase in probation intakes is expected to continue to slow, further moderating the growth in the total caseload.

Monthly detail of the prison population forecast and the various components of the community corrections caseload forecast appear in the Appendix.

**Table 6: Estimated Impact of Measure 11 On Prison Population**

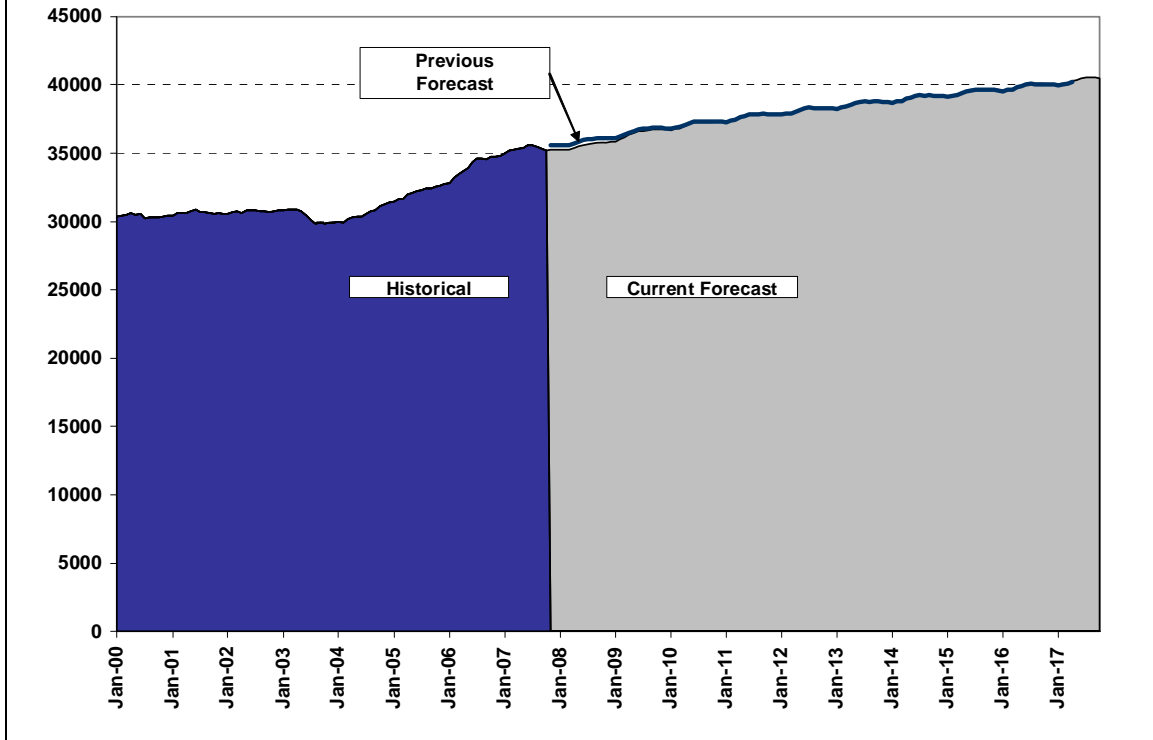

<b>Date</b>	<b>Direct Impact</b>	<b>Indirect Impact</b>	<b>Total Impact</b>
Jan-08	2,688	1,128	3,816
Jul-08	2,775	1,214	3,990
Jul-09	2,966	1,281	4,248
Jul-10	3,127	1,337	4,464
Jul-11	3,240	1,352	4,592
Jul-12	3,314	1,404	4,718
Jul-13	3,428	1,432	4,860
Jul-14	3,524	1,458	4,982
Jul-15	3,673	1,483	5,155
Jul-16	3,747	1,505	5,251
Jul-17	3,826	1,527	5,353
Jan-18	3,851	1,518	5,369
Total Growth		40.7%	1,553

Figure 3 and Table 7 compare the current and previous community corrections caseload forecasts. Table 8 shows intake growth rates.

Figure 3 shows that growth in the probation caseload has begun to slow considerably during the first half of 2007 when compared with 2006.

The parole and post-prison supervision caseload grows along with the prison
