

Bio
Mark Reyer

Mark Reyer has over 28 years of IT experience including over 15 years as a senior manager and executive. Beginning in the Time Sharing industry and continuing on as an executive and consultant in the outsourcing business, Mark has a deep background in running data centers as a business, with a focus on customer satisfaction, high quality, cost effectiveness, and high employee moral. He spent 15 years with IBM and was a pioneer in IBM's data center outsourcing business. During that time Mark was the executive in charge of large outsourcing customers such as United Technologies and Allied-Signal. While at IBM, Mark led the consolidation of several data centers and was recognized as an expert in data center efficiency. He was put in charge of IBM's National Data Center Competency consulting practice. His team was responsible for advising fortune 500 customers in improving data center efficiency and effectiveness. Following IBM, Mark started an IT Managed Services business for Teksystems, growing it from infancy to over \$150 million in five years.

He moved to Portland to build a 40,000 square foot data center in Hillsboro to start a Managed Service Provider (MSP) business. With the dot-com fallout, Mark and his family decided to stay and make a permanent home in Oregon.
