Subject: Defects Task Force

Kelly:

Thanks for your letter and for expressing your concerns. The letter will be added to the website containing similar letters and contacts as well as other information.

My firm - and I personally - handle both plaintiff and defense work on construction and design defects matters.

The Task Force meetings are open to the public, but not every meeting will allow time for open public forum (i.e., receipt of public comments). I hope you understand that the Task Force has a large job to do in a short period of time, and we must focus our time and energy. There will, however, be future opportunities to accept public comment, and written submissions are welcome at any time. I suggest you visit the website to learn more about these opportunities.
