Subject: Public Input-Task Force related business

Name: Betsy Lee

Date: November 8, 2005

Issue: Ms Lee expressed concern about the quality of construction on her home in Gresham. She has made numerous efforts to work with her contractor to resolve the many defects in her home. She has received no satisfaction. She has contacted the insurer for the contractor. They have not replied. She contacted the CCB and received no satisfaction. She has contacted the Gresham city inspection and code enforcement department and received no satisfaction. Finally she has hired at her own expense her own experts to verify the problems and hired an attorney to begin suit if needed to gain action. This inspection has revealed numerous code violations and sloppy workmanship even though the house was approved by the city of Gresham for occupancy. She has expressed an interest in testifying at an upcoming task force meeting. She requested to be notified when the next public comment would be allowed.

Action Taken: I advised Ms Lee that I would send this e-mail to the DCBS and encouraged her to attend any of the meeting and testify when the public comment was allowed. I also indicated she could submit any written comments that she would like. She was aware of the web site and the information available on the web site.
