Public health advisory lifted for Paulina Lake

A health advisory prompted by high algae levels found in Paulina Lake, located about 25 miles south of Bend within the caldera of Newberry Volcano, was lifted today by the Oregon Department of Human Services (DHS) and the Deschutes County Health Department. The advisory went into effect Aug. 27.

Water monitoring has confirmed reduced levels of blue-green algae, which can produce toxins harmful to humans and animals.

These reduced levels are not likely to be associated with dangerous toxin concentrations in the water, according to World Health Organization guidelines.

DHS advises people who recreate in Oregon water bodies always to be alert to signs of algae blooms. People and their pets should avoid water contact if there are visible clumps of algae in the water. Boating is safe as long as speeds do not create excessive water spray, which could lead to inhalation risk.

For local information contact the Deschutes National Forest at 541-383-5300 or www.fs.fed.us/r6/centraloregon/.

For health information, contact Laura Boswell, DHS Harmful Bloom Surveillance program coordinator, 971-673-0438 or www.oregon.gov/DHS/ph/hab; also, the DHS toll-free information line at 1-877-290-6767, or Deschutes County Health Department at 541-322-7418.
