

## Oregon Trauma Registry Case Definition

A trauma system hospital shall submit data to the Oregon Trauma Registry (OTR) for each and every patient as defined below:

1. Patients entered into the trauma system by field personnel.  
(Exhibit 2)
2. Any patient for whom the trauma team is activated.  
(Exhibit 3)
3. A patient whose injuries require a surgeon's evaluation and treatment.
4. Patients transferred to a trauma center for trauma system care.  
(Exhibit 5)
5. Patients who met triage criteria or interhospital transfer guidelines at the transferring facility. (Exhibits 2, 5)
6. Patients who did not receive a trauma team response but retrospectively, at either the transferring or receiving facility, have any of the following:
  - A. ISS >8
  - B. Death
  - C. Major operative procedure within 6 hours of hospital arrival.
  - D. ICU admission within 24 hours of hospital arrival.
7. Any patient previously treated within the trauma system (at any trauma center) who required unplanned readmission from treatment of injuries or complications resulting from the initial injuries.

### **EXCLUSIONS:**

- **any injured patient with an isolated hip fracture resulting from a fall from the same height**
- **mechanisms without accompanying anatomical injuries:**
  - **poisoning**
  - **drowning/near drowning**
  - **suffocation/asphyxiation**
