

Methods Manual Index

absolute deviation	7-5	appraisal benchmarks–	
accrued depreciation	6-5, 9-25	farm and ranch properties	11-10
ad valorem	1-1	appraisal office work	2-15
additional tax, farmland	14-3	appraisal performance review	2-9
adjustments, nontypical sales	9-33	appraisal principles	5-1
allocation procedure	8-2	appraisal procedures–	
anticipation	5-1	income-producing properties	10-1
appeals	2-17, 18	appraisal ratio studies	7-3
BOPTA	15-4	appraisal staffing worksheet	2-13
centrally assessed	15-17	array	7-5
Department of Revenue	15-2, 13	assemblage	5-1
hardship appeals	15-14	assessed value	13-4
miscellaneous appeals	15-15	assessment date	1-2
supervisory authority appeals	15-13	assessment, legal basis	1-1
Supreme Court	15-2	assessment roll	1-6
Tax Court–		assessment time line	2-3
Magistrate Division	15-8	assessor	2-2
small claims procedure	15-12	assessor, duties of	1-3
Regular Division	15-12	assessor's office organization chart	2-1
appeals matrix	15-3	average absolute deviation	7-5
applying cost factors	9-7	balance	5-1
base appraisal date	8-4, 9-10	basic costing procedures	9-1
base lot	8-9	central tendency	7-5
base lot description	8-14	centrally assessed property	1-4
base specifications	9-5	change	5-1
base standards–		changed property analysis codes	13-4
income-producing properties	10-29	changed property and exceptions	13-1
base unit values–		changed property ratio (CPR)	13-2
farm and ranch properties	11-6	chief appraiser	2-2
base value schedule–		chief cartographer	2-2
farm and ranch properties	11-10	chief deputy/office manager	2-2
bias	7-5	class features	9-4
Board of Property Tax Appeals		classification	9-2
(BOPTA)	15-1	code number	4-9
building residual technique	6-28	coefficient of dispersion (COD)	7-5, 13
cadastral map	4-11	collect improved sales data	9-11
capital improvements	6-20	collection loss	6-18
capitalization	6-24	comparative method	6-4
capitalization rate	6-24	competition	5-2
capitalization rates and components	10-23	condominiums	4-12, 12-1

contract rent.....	6-18	extraction procedure.....	8-2
Confidential Personal Property Return	1-4	farm use special assessments.....	14-2
conformity	5-2	farm use valuation.....	14-2
consistent use.....	5-2	farmland qualification	14-2
contribution	5-2	field and office procedures	2-8
cost approach to OSD	8-11	field appraiser	2-2
cost approach process	6-5	frequency distribution	7-6
cost approach to value.....	6-3	frequency of appraisal.....	1-3
crop deduction	11-5	functional obsolescence	6-6, 9-25
curable functional obsolescence.....	6-7	general ongoing maintenance & repair	13-3
curable physical deterioration	6-6	graphs, statistical analysis	7-9
data analyst.....	2-2	gross income multiplier (GIM)– mass appraisal	10-31
data standards	7-3	gross income multipliers	6-32
debt service.....	6-20	gross income-to-expense ratio	6-32
deferred maintenance.....	6-5	ground rent capitalization procedure	8-3
Department of Revenue, role of	1-2	heterogeneous	7-6
depreciation	6-20	highest and best use	5-3
depreciation benchmarks– residential	9-25	homogeneous	7-6
income-producing properties.....	10-16	income and expense data.....	10-3, 19
depreciation schedule– residential	9-30	income approach.....	6-16
income-producing properties.....	10-17	income approach to value– computation	10-35
determine workload	2-10	income taxes	6-20
direct capitalization method	6-26	income–rate–value (IRV) formula.....	6-24
direct costs.....	6-3	increasing and decreasing returns	5-2
discount rate	6-23	incurable functional obsolescence	6-7
discount rate, mass appraisal.....	10-27	incurable physical deterioration.....	6-6
disqualification, farmland	14-3	indirect costs	6-3
effective gross income (EGI)	6-17	Industrial Property Return	1-4
effective tax rate	6-25	information systems unit manager.....	2-3
elements of comparison	6-11	inspecting the property.....	9-1
entrepreneurial profit	6-4	inspection levels.....	9-36
estimate staff requirements	2-11	journal vouchers.....	3-7
example of a deed	3-3	land classification– farm and ranch properties.....	11-1
example of tax lot card.....	3-5, 6	land leases.....	8-25
examples of sales data records	3-10	land residual capitalization procedure.....	8-3
exception calculation	2-17	land residual technique.....	6-28
exemptions	14-1	land-to-building ratio	6-32
expenses before– discount, recapture, and taxes.....	6-19	land valuation techniques	8-2
external obsolescence	6-8, 9-25	land values–	
externalities	5-2		

establishing.....	10-9	physical reappraisal.....	7-2
limited sales.....	8-22	planned communities.....	4-12, 12-6
local cost modifier (LCM)–		plottage.....	5-3
residential.....	9-15	population.....	7-6
income-producing properties.....	10-12	population testing.....	7-7
long-lived items.....	6-6	posting field maps.....	9-34
maintenance appraisal.....	2-17	potential gross income.....	6-17
map of base line and meridian.....	4-2	preappraisal set-up–	
market area.....	7-6	land.....	8-4
market rent.....	6-17	farm and ranch properties.....	11-5
		residential.....	9-10
mass appraisal–		preappraisal set-up studies.....	2-16
land.....	8-1	price related differential (PRD).....	7-6, 13
residential.....	9-1	principle of substitution.....	6-3
income-producing.....	10-1	progression.....	5-3
farm and ranch.....	11-1	progressivity.....	7-6
market transactions.....	6-9	property class codes.....	1-4
MAV calculation for exceptions.....	13-2	property description record.....	3-4
maximum assessed value.....	13-1	property residual technique.....	6-29
mean.....	7-6	property taxes.....	6-20
median.....	7-6	property transaction records.....	3-2
minor construction.....	13-2	property value appeals.....	1-6
miscellaneous income.....	6-19	qualification of farmland.....	14-2
neighborhood analysis.....	8-5	quality class benchmarks–	
neighborhood data–		residential.....	9-11
physical;economic;governmental.....	10-6	income properties.....	10-9
neighborhood land schedule.....	8-17	quantity survey.....	6-4
net operating income (NOI).....	6-17	quarter section map.....	4-4
netting new property and retirements.....	13-4	quarter-quarter section map.....	4-5
not same as appraised (NSAA).....	7-14	rate of return–	
office support.....	2-2	farm and ranch properties.....	11-8
on-site development (OSD).....	8-11	ratio study.....	7-2
operating expenses.....	6-20	ratio study analysis.....	7-7
oregon cadastral map system.....	4-1	real market value (RMV).....	1-5, 7-12
ORMAP (oregon map).....	4-1	Real Property Return.....	1-4
other special assessments.....	14-3	reappraisal.....	2-9
overall rate development.....	10-23	residential.....	9-36
percent good–		farm and ranch.....	11-17
residential.....	9-26	recalculation.....	7-2
farm buildings.....	11-16	recapture rate.....	6-25
percent useful, farm buildings.....	11-16	recapture rate development.....	10-26
physical deterioration.....	6-5, 9-25	reconstruction of reported expenses.....	6-23
		regression.....	5-3

regressivity	7-6	replacement cost new	11-16
remaining economic life	6-33	reproduction cost	6-3
replacement cost	6-3		
reserves for replacement	6-21	supervisory field work	2-14
return of investment	6-24	supply and demand	5-3
return on investment	6-24	Supreme Court	15-2
sales comparison	6-13	surplus productivity	5-3
sales comparison (market) approach	6-9	tax, calculation of	1-6
sales comparison approach to OSD	8-13	tax, imposition of	1-1
sales comparison grid	6-13	tax collector, role of	1-7
sales data	6-9	Tax Court	15-1
sales data records	3-9	tax rate component	10-23
sales ratio	7-6	taxable assessed value	1-5
sample	7-6	time adjustment studies	7-9
sample average	7-8	timeshare estates	12-5
selection of capitalization technique	6-27	township map	4-3
short-lived items	6-6	trimming	7-14
size adjustment, land	8-18	uniformity	7-6
special interest number	4-10	uniformity and equity	7-1
special scale maps	4-8	unit-in-place	6-4
standard map number	4-8	units of comparison–	
standard tax lot number	4-9	building	6-10
statistics and appraisal standards	7-1	land	8-9
stratification studies	7-10	vacancy	6-18
substitution	5-3	vacancy and collection loss	6-18
supervising appraiser	2-2		
valuation of rural buildings	11-13		
valuation of rural tract land	8-18		
valuation process	6-1		
valuation standards	7-12		
valuation studies	2-16		
value zones	11-3		
water rights	11-4		
weight	7-7		
weighted mean	7-7
