Incident Safety Officer

Location: Hillsboro, OR

Time: 0800-1700

Contact:

Registration: Email hollyp@ci.hillsboro.or.us or call 503-681-6477. Registration is an agreement to pay the fee and attend the course unless 72 hour notification is provided.

Cost: \$20.00

Class: National Fire Academy Incident Safety Officer

Location: Hillsboro Fire & Rescue – Parkwood Station. 275 NW 25th Avenue, Hillsboro, OR 97123

Course Goal: The goal of this course is to provide fire department members with the knowledge and skills to perform the duties of the Incident Safety Officer (ISO) during incident operations and training evolutions.

Course Overview & Objectives: Students will identify the most common types of firefighter fatality and injury data and identify the common denominators. Principles of risk management will be studied so students understand the risk management model and how it has a positive effect on fire department operations. In addition, students will identify the requirements for ISO as defined in the National Fire Protection Association (NFPA) 1500, Standard on Fire Department Occupational Safety and Health Program and NFPA 1521, Standard on Fire Department Safety Officer. Current issues will be examined to identify safety issues relating to wildland firefighting, highway /traffic safety, terrorism, and fire-ground communications. Emphasis will be placed on the importance of incident scene rehabilitation. Factors relating to managing risk during fire and rescue operations will be addressed along with terminology, pre-emergency risk management, immediate risk, forecasting, operational risk management, and termination of operations.

Instructor: Sam Phillips is the training Chief for Hillsboro Fire & Rescue. Chief Phillips serves as a Type II Safety Officer on the Oregon State Fire Marshal's Incident Management Teams.

Target Audience: Company Officers and Senior Firefighters

National Fallen Firefighters Foundation In cooperation with DPSST

Present: "Courage To Be Safe...So Everyone Goes Home" Train – the – Trainer

"Courage To Be Safe" is a NFFF Life Safety Initiatives program. The NFFF recognizes that firefighters must have the courage to face a multitude of risks in order to save lives and protect their communities.

But a different type of courage is required to stay safe in potentially dangerous situations, avoiding needless risks and tragic consequences.

That courage is the focus of this program!

This proactive and moving presentation graphically underscores the need for firefighters and officers to change fundamental attitudes and behaviors in order to prevent line-of-duty deaths, and promote the courage to do the right thing to protect themselves and other firefighters so that "Everyone Goes Home" at the end of the day.

A key part of this program is the untold story of LODD survivors, revealing the pain and heartbreak that the loss of a firefighter brings and illustrating that the consequences of a LODD are a family affair in every sense of the word!

This is an "in your face" program that EVERY firefighter should see!!!

Who should attend: Fire Service Instructors with superior presentation experience and a true passion for firefighter safety!. This program will prepare you to work with the state and regional advocate in your area and assist in bringing this program to fire departments throughout your region. Each attendee will receive a copy of the "Courage To Be Safe" curriculum and support materials, to allow them to present the course in their agency and throughout the state.

Command & Control of Target Hazards

Location: Salem, OR

Time: 08001700

Contact:

Registration: Call Thelma Denney at 503-378-2408 or email thelma.denney@state.or.us>

Cost: FREE

The Department of Public Safety Standards & Training in cooperation with Region X TRADE is pleased to host the 6-day National Fire Academy Course. "Command & Control of Fire Departments Operations at Target Hazards". The class will be held at the Oregon Public Safety Academy in Salem. No cost lunch will be provided and limited lodging is available.

Course Code N825 Description: This 6-day course is designed to introduce command officers to the complexities involved in commanding incidents in high-risk areas. Students are confronted with a number of fire and rescue incidents that include high life hazard, multiple exposure, and unusual occupancy risk considerations. Students are introduced to advanced applications in the Incident Command System (ICS), command and control decisionmaking, strategic and tactical considerations, preincident preparation, documentation, and postincident analysis. Several simulations and case studies are used to depict and review incidents in various types of target hazards. Some examples of these are penal institutions, bulk oil-storage facilities, nursing homes, colleges, chemical/agricultural manufacturing plants, and grain elevators. This course is very comprehensive and uses lecture, case study, simulation, and student participation as instructional methods.

Student Selection Criteria: Chief Officers or other officers who would have the responsibility to command incidents involving target hazard (high-risk fire and rescue) incidents, and other officers involved in the transfer of command to a higher level. Additionally, individuals who may have this responsibility and are upwardly mobile in their organizations may be considered. Certification in the form of a letter of recommendation from their fire department stating that they meet the selection criteria based on the need and organizational structure of the department being represented is required. You can obtain a FEMA form 75-5a from the website <http://www.nbmg.unr.edu/nesc/75-5pdf>

2008 Metro Fire Officers School

Contact: Shelby Martin 503-367-7826

<mailto:shelby.martin@nwaft.org>

Registration: online at www.nwaft.org

Academy Mission: This academy was created to offer the highest quality of education for fire officers. Its goal is to produce greater professionalism and competency, while building a better understanding and working relations among participating departments

Academy Dates: September 15-19, 2008 and October 13-17, 2008 and November 17-21, 2008

Costs: \$600.00 for NAFT members and \$700.00 for non-NAFT members for the three week, 120 hour course. Cost includes all handouts, materials and continental breakfast/afternoon snack. Registrations and payments due by July 2nd, individual names not needed until August 15th.

Academy Accreditation: Upon successful completion of the Academy, students will have completed most of the NFPA Fire Officer I requirements. For Oregon departments, additional general education requirements from the Oregon Department of Public Safety Standards and Training (DPSST) must still be met.

Students can also receive 14 credits from Portland Community College for an additional fee of \$125.00.

Attendance Requirements: Students must make the commitment for all days. In order to receive a certificate, students can only miss one day or a total of 8 hours with prior notification to the Academy.

Evaluation Requirements: A project will be required to be completed during the academy. The topic is assigned by your training officer and must be related to a company officer issue. Projects are due to your training officer and the Academy Coordinator by December 15th, 2008. Upon approval of your project, by your training officer a certificate will be issued.

RIT Drill: There will be a mandatory evening RIT drill. Students will be notified which evening during the academy they have been assigned.
