

## 2009 GEOTHERMAL COMPANIES WITH TAX CREDIT- CERTIFIED TECHNICIANS

**Updated 6/9/09**

Following is a list of companies that employ tax-credit certified geothermal technicians. We provide the list for your convenience and only for purposes of assisting Oregon taxpayers in obtaining a Residential Energy Tax Credit. An Oregon resident must have a tax credit-certified geothermal technician install their system to be eligible for a Residential Energy Tax Credit. Companies listed have employees who have successfully completed approved geothermal training and Oregon Department of Energy tax credit training and have signed an annual agreement with the Oregon Department of Energy. The Oregon Department of Energy does not make any warranty, expressed or implied, concerning the construction, operation, installation or any other characteristic or feature of systems installed by the technician.

Companies that are interested in the tax credit-certified geothermal technician training should contact Angie Whitethorn at 1-800-221-8035 (toll-free in Oregon) or (503) 378-4040.
