

Let's clean up Johne's

# Oregon Johne's Program update

Oregon Department of Agriculture continues to support Johne's reduction and prevention efforts.

---

## Johne's testing

- All test results are confidential.
- Tests are available as follows:
  - **Blood ELISA:** \$13.00 first test  
\$4.50 per test for two to 10 tests  
\$4.00 per test for more than 10 tests
  - **Fecal culture** (single or pools of five): \$12.00 per test
  - **Fecal PCR:** \$45.00 first test  
\$12.00 each additional test

---

## Risk assessments & management plans

- Contact your private practitioner or ODA to conduct a risk assessment and prepare a management plan. This assessment and plan provide an effective means of dealing with Johne's and all other fecal borne diseases.
- There are over 140 Oregon dairy herds enrolled in the Johne's Management Program.

---

## Johne's status herds

- There are 15 herds in the Johne's Status Program.
- Any test negative or low incidence herd may be eligible for an appropriate level.
