

Washington Toxics Coalition vs. EPA
Court Order for Injunctive Relief
Effective February 5, 2004

Tillamook County

Maps Of Streams Subject To Buffer Zones Requirements For Certain Active Ingredients

Species Affected by Federal Court Order in Tillamook County
1. Coho Salmon, Map #1 (Oregon Coast Coho ESU) - 5/12/08

This document is intended to assist you in determining if buffer restrictions are required for applying certain pesticide active ingredients near specific bodies of water. Follow the steps below to determine if your use of pesticides will be affected by this court order:

1. Proceed to the attached map to determine which township, range and section your application site is located within. You may use the zoom feature in adobe acrobat to view details of a particular area within the map.
2. Note any streams or rivers that are adjoining the intended application site. If you are unsure if the application site is adjacent to a depicted stream, please contact ODA pesticides division at 503-986-4635 for further instruction.
3. If there are no listed streams or rivers adjoining the application site, then the court order is not applicable to your situation. No buffer zones will be required. Follow all label directions and restrictions.
4. If the land that you will be applying to is adjoining one or more depicted streams, consult the list of active ingredients on this page. If any of the active ingredients are found in the pesticide product(s) you intend to use, then a buffer must be observed. Buffer zones are 20 yards by ground or 100 yards by air from the ordinary high water mark of the stream unless otherwise indicated.
