SUMMARY

This consent item is to inform the Board that the State Forests Program has updated the "Adapting the Northwest and Southwest Oregon Forest Management Plans, Issue #2" Board of Forestry Work Plan for 2007.

CONTEXT & BACKGROUND

In April 2005, the Board began operating under a set of priority issues that prescribed its work plan items. One of these priority issues is *Adapting the Oregon State Forests Management Plans, Issue #2*. The 2007 work plan updates the previous Issue #2 work plan based on progress made in 2006, and identifies the priority activities under four objectives.

NEXT STEPS

The State Forest Program will continue to assist with the implementation of the four work plan objectives and with the completion of the Board products described therein. These discussions between the Board and program regarding adapting the forest management plans will be dynamic. Therefore, timeframes and milestones identified in the work plan will likely be adjusted over time.
