INTRODUCTION

This is the January 1998 revised edition of the ODOT Sign Stock Catalog.

Please order stock signs and custom signs on separate Storeroom Order and Invoice forms. If there is a number listed under the *Stock Number* column, it is a stock sign. If there is no number listed under the *Stock Number* column, it is a custom sign. The number listed under the *Sign Number* column is the standard sign number, regardless if it is a stock or custom sign.

On an SOI for a stock sign order, the stock number should be entered under the *Storeroom Stock No.* column. On an SOI for a custom sign, the sign number, if listed, should be entered under the *Part No.* column. The *Expenditure Account*, *Subjob* and *Activity* sections are where you put your **field stockpile** number or job charge number, depending on what EA you want to charge. Please keep in mind the difference between the **field stockpile numbers** and the **Sign Shop stock numbers**.

Sign prices are determined by square footage. The total square footage of each sign in the catalog is in the last line of the sign description. Prices per square foot are:

Custom Signs	\$12.23	
Stock Signs	\$ 8.00	
Extruded Panel Signs	\$14.04	plus the cost of legend

Orders for stock and custom signs listed in the Sign Catalog are to be sent to the Sign Shop. Please order stock signs and custom signs on separate Storeroom Order and Invoice forms.

All orders for custom signs not listed in the catalog are to be sent to Traffic, Sign Design, Attn: Orville Gaylor, Room 504A Transportation Bldg., Salem, OR 97310. Sign Design will coordinate through the District Managers, Sign Crews and Sign Shop to assure that signs are standardized and conform to the MUTCD and State sign policy. Sign Design will forward the orders to the Sign Shop.

When ordering custom signs that are not included in this catalog, figure the square footage to the nearest even number, (i.e. 18" x 18" = 2.25 square feet, round down to 2 square feet, 18" x 12" = 1.5 square feet, round up to 2 square feet.) If a sign is printed on both sides, add the square footage for each side together to determine the total square feet.

If you have an emergency order, call the Sign Shop at (503) 986-2805 and send e-mail authorization; or FAX your order to us at (503) 986-2809. If you call in your order, we will give you an SOI number. Please send an authorizing e-mail referencing the SOI number, listing the signs required and expenditure account(s).

We hope the Sign Catalog is helpful to you. Additional copies are available upon request.

NUMBERING SYSTEM AND ORDERING

The signs included in this catalog are divided into sections by general types (refer to the Table of Contents). Within each section, the signs are listed in order by the *sign number*. Where appropriate, the sign numbers are based upon the Manual on Uniform Traffic Control Devices (MUTCD) or Sign Policy.

There are a number of signs in the Manual on Uniform Traffic Control Devices that appear in this catalog without a stock number. These signs are generally not used in Oregon; therefore, they are not stocked. However these signs may be obtained by ordering them through the Sign Shop on a separate SOI. CAUTION: Some signs may not appear in this catalog because State Law or Sign Policy does not allow them.

The Sign Stock Catalog was made to cross-reference with the Manual on Uniform Traffic Control Devices. Note that the numbers in the MUTCD contain less codes than the sign number; therefore, signs should be ordered from this catalog rather than the MUTCD, listing the entire sign number on your SOI.

For example, to order the Advisory Speed Plate shown on Page 2c-19 of the MUTCD for a speed of 45 miles per hour in the 24-inch size, you would note the number W13-1 (the MUTCD sign code), then turn to the catalog under this general number.

The sign number in this instance is W13-1-24-45. This means black film on yellow high intensity scotchlite, Warning 13-1 series, 24 inches high and 45 miles per hour.

Any other way it may be written will get you the wrong sign or not enough information will be obtained to fabricate the sign you need.

You will note on pages 36 and 37 of this Sign Stock Catalog that several signs have been established from this one number in the MUTCD. There are several more existing numbers that do not appear in this catalog. Each number is very important in itself as each sign in the W13-1 series has a different prefix and/or suffix. Take great care in ordering the sign that fits your needs.

Should you wish the above sign to be in the construction color your number takes on a whole different meaning. CW13-1-24-45 means Black film on Orange high intensity scotchlite, Warning 13-1 series, 24 inches high and 45 miles per hour.

PLEASE NOTE: You must state on the SOI or on the drawing if you want signs that have **diamond grade** background or legend.

The numbering is done this way to enable you to use the MUTCD along with your ordering and also gives a visual picture of the exact sign you have in mind.

Some of the prefixes you will be using are detailed in alphabetical order on the following page. All Directional signing is "D", "I", or "OD"; all Regulatory signing is "R" or "OR"; and all Warning signing is "W", "OW", or "COW."

Prefixes that contain an "O" are signs contained in the Sign Policy and Guidelines for the State Highway System. Prefixes that do not contain an "O" indicate the sign is originated from the Manual on Uniform Traffic Control Devices.

SIGN NUMBER PREFIXES:

B	Bike
CD	Civil Defense
CG	Construction Orange, Guide
CM	Construction Orange, Marker
COG	Construction Orange, Oregon, Guide
COW	Construction Orange, Oregon, Warning
CW	Construction Orange, Warning
D	Directional
E	Expressway
FCOW	Rider, Construction Orange, Oregon, Warning
FCW	Rider, Construction Orange, Warning
FD	Rider, Directional
FOD	Rider, Oregon, Directional
FOP	Rider, Oregon, Park
FOR	Rider, Oregon, Regulatory
FOW	Rider, Oregon, Warning
FR	Rider, Regulatory
I	Information
IM	Interstate Marker
IS	Interstate Shield
K	Emblem
M	Marker, U.S. or State
OD	Oregon, Directional
OP	Oregon, Park
OR	Oregon, Regulatory
OS	Oregon, School
OW	Oregon, Warning
P	Park
R	Regulatory
RA; RG; RL; RM	Recreational
RS; RW; ORM	
S	School
W	Warning
Z	Roll-up Type Signs

The body and suffix portion of the number also play important parts in obtaining the sign you request. The letters "LT" and "RT" will appear after the main part of the number (W1-2), for example:

W1-2LT-48: Warning 1-2 Left 48 Inches High

You have probably already noticed that the vertical measurement of the sign will appear in the order number. This measurement will follow directly after the main part of the number. Such as the 60" x 30" sign:

R11-3-30: Regulatory 11-3 30 Inches High

Under the "COLOR" column you will see listed the color of each particular sign. These colors are in a determined order. Refer to Manual on Uniform Control Devices, page 71. The sign appears to be Red, Yellow and Green on Black and then on Yellow; therefore it is stated as follows:

RD,YEL,GR/BLK,YEL

The abbreviations for these colors are:

Black	BLK	Green	GR	Silver	SIL (Reflective)
Blue	BL	Red	RD	Yellow	YEL
Brown	BR	Orange	OR	White	WH
Cream	CR (Parks)	Walnut	WAL		

White is non-reflective film or diamond grade. Do not state "White" if you need engineering grade reflective scotchlite or high intensity scotchlite; "Silver" is the correct color.

TYPE OF FACE

HI	High Intensity Scotchlite
RS	Reflective Scotchlite (Engineering Grade)
PI	Plain (Film or Painted)
DG	Diamond Grade
