

TYPICAL SECTIONS

ROADWAY ENGINEERING SECTION

DATE: January 28, 1993

TO: Designers

INTEROFFICE

MEMO

FROM: *Norm Cuno*
Norm Cuno
Design Support Supervisor

SUBJECT: Equations in Typical Section

We have always had an office policy that all alignment equations are shown in the plans and profiles, but only those of significance are shown on the Title Sheet or in Typical Sections. This has been defined as equations of 50 feet or more.

This policy remains in effect, and the purpose of this memo is to formalize the policy by putting it in writing.

MEMO TO DESIGNERS

October 2, 1973

In response to a request from the field construction people please show access roads to benched cuts. These are required so that maintenance forces may get to the benches to clean up the ravel and maintain drainage.

(Note
Format) Const. Cut Slope Benched Access Rd.
(Final Location As Directed By Engineer)

Min. 12' width } standards
Max. 25% grade }

Frank E. Terpin
Final Design Engineer
