## ODOT's TripCheck helps motorists prepare for traveling

SALEM — The Oregon Department of Transportation wants to help motorists.

Imagine you're stuck in traffic. Rain is pounding on the roof of your car. Your favorite radio personality is warning of congestion ahead. Is there an accident? A lane closure or detour you didn't know about?

A visit to TripCheck.com would have been wise.

Winter weather and unprecedented levels of highway construction statewide mean drivers should be prepared. The Oregon Department of Transportation's TripCheck Web site provides motorists with a one-stop site for Oregon travel information.

TripCheck is more useful than ever for motorists as construction ramps up on Interstate 5, Interstate 84 and other major routes across the state, mostly due to ODOT's \$1.3 billion OTIA III State Bridge Delivery

Program.

The bridge program, part of the agency's 10-year, \$3 billion Oregon Transportation Investment Act, is repairing and replacing hundreds of aging bridges across the state. On I-5 alone, drivers will pass through more than 20 active work zones between Portland and Medford in 2007.

At TripCheck.com, visitors can access current construction updates, view the latest road conditions via road cameras, get winter travel updates and find tips on how to travel by bus, rail or ride-share.

Travelers can easily access information about construction zones and approximate delay times by simply passing their cursor over an icon on a map. Alternately, the 511 system, created by the federal government in 2000, delivers traffic and weather information directly to callers over the phone.

"It's a simple, easy-to-use

system that focuses on timely information for Oregon travelers," said Galen McGill, who oversees TripCheck as ODOT's manager of intelligent transportation systems. "Because of more active construction, more people are checking TripCheck in the summer than ever before, but winter still records the highest activity."

In an average month, 1.2 million visitors consult the site, and during severe winter storms, usage has spiked as high as 3.3 million.

"We're making resources for drivers available, whether it's information on bridge program projects or winter driving conditions in the mountains," McGill said. "People will be better prepared for the conditions they encounter if they know what to expect."

Check out TripCheck before you go. It can save you valuable time and money.
