Re: File No. 34-2681
Application No. 034907
AQ-Northwest Region

Mr. Lund,

DEQ has received Intel's application for a New Source Review/Prevention of Significant Deterioration permit. The application has been assigned number 034907. As part of this process, in accordance with the Cleaner Air Oregon program OAR 340-245-0050(1)(b), Intel was also required to submit a Toxic Air Contaminant Emissions Inventory (TAC EI) for review and approval which accounted for the changes in emissions related to the proposed modification. At this time DEQ approves the TAC EI for the purposes of considering this permit application complete. In the future, Intel will be required to complete a facility-wide risk assessment when DEQ formally "calls-in" the facility to the CAO program, which will be done according to the [Prioritization Groupings](#) for existing facilities.

The purpose of this letter is to notify Intel that the application is considered complete for processing as of the date of this letter.

Under OAR 340-216-0040(11) and (10)(a), if at any time while processing the permit application, DEQ determines that additional information is needed, DEQ will promptly ask for the needed information and provide a written request to provide such information by a date, not to exceed a 60-day period.

As required by OAR 340-209-0030(3)(d), DEQ will schedule a public informational meeting. During the meeting, DEQ will describe the proposed permit action and respond to questions from the public. DEQ will consider any information gathered in this process in its drafting of the proposed permit but will not maintain an official record of the meeting and will not provide a written response to comments. Intel will be notified when the informational meeting is scheduled.

If you have any questions, please contact me at 503-724-8293.

Sincerely,

George Davis

DEQ Northwest Region
