## Description of Monthly Sector Charts

Payments data from corporate excise tax and withholding programs is compiled monthly, for distribution to parties in the Department of Revenue and related economic and legislative agencies. The chief purpose of the Monthly Sector Charts is to provide up-to-date information about revenues coming into the State of Oregon. The payments data for each program is grouped by NAICS supersector, classifying companies into 20 industry sectors (or Unknown), and usually delivered by the second week following the reference month.

Payments are aggregated over the previous 12 months to remove seasonality and smooth the series. For example, data for January 2020 includes all withholding payments from February 1, 2019 to January 31, 2020.

Net corporate excise tax payments includes payments and refunds from the corporate excise, income and multi-state tax programs. Net withholding payments includes payments and refunds from the withholding tax program. Initially, some payments might not be allocated to a sector and will appear in the Unknown sector (99).

Major sectors in the state of Oregon are indexed to provide a relative comparison of withholding payments by industry. Sectors indexed in this way are Finance and Insurance, Healthcare and Social Assistance, Manufacturing, Public Administration and All Sectors.

## About NAICS

The North American Industry Classification System (NAICS) is the system for classifying business establishments used by most statistical agencies in the United States. In NAICS, economic units that use like processes to produce goods or services are grouped together.

Taxpayers are asked to provide a NAICS code on some tax returns and when they register as an employer in Oregon. Generally the NAICS code represents the primary business activity that generates at least 50% of the tax revenue. Different business activities generate corporate tax versus withholding tax, so the taxpayers and their NAICS codes do not necessarily overlap between the Corp and withholding sector charts. The taxpayers and their NAICS codes do not necessarily overlap with the employment statistics produced by the Oregon Employment Department.

Sector charts are aggregated by the two-digit NAICS “supersectors” listed below.
