Appendix C: Internet References

Web Site	Data Provided	Goal 9 Reference
www.oregon.gov	Governments: including city, county, council of government, state agency, or federal agency data often provide some GIS information that is periodically updated. The State of Oregon web site, www.oregon.gov, has connections to all cities, counties, and state agencies. Many states now have some kind of GIS data clearinghouse or links to data providers.	Supply and Demand
www.gis.state.or.us	Oregon Geospatial Data Clearinghouse maintains various state-wide GIS layers for download.	Supply
www.ous.edu	College or University Libraries; both University of Oregon and Oregon State University libraries have GIS collections.	Supply and Demand
www.terra.geo.orst.edu/ucgis	College or University Departments are now beginning to make available data that has been used or created in the course of their research. This web site is for Oregon State University Geographic Information Sciences. This web site describes GIS and GISci facilities, research, faculty and education at Oregon State University (OSU), Corvallis, Oregon. It is also OSU's online portfolio for membership in the UCGIS.	Supply
www-sul.stanford.edu/depts/gis/web.html	College or University web sites that present lists of various state and national GIS data sources. A good example is from Stanford University. Last updated October 13, 2004.	Supply and Demand
www.esri.com/data/index.html	Access to the right data is key to intelligent GIS analysis. ESRI offers a variety of data products to support your applications. ESRI also promotes and supports a strong group of partners who provide a wide range of data products in ESRI-compatible formats.	Supply and Deman d
www.seamless.usgs.gov/viewer.html	The United States Geological Survey (USGS) maintains the National Map that allows viewing and downloading of data.	Supply
www.nsdi.usgs.gov	The USGS maintains a National Geospatial Data Clearinghouse. This site provides one-meter aerial photography, digital elevation models, and various nation-wide date sets that can be used to identify land forms and topographic features.	Supply
www.fema.gov	The Federal Emergency Management Agency (FEMA). They provide floodplain and associated date that can be viewed at www.gis.msc.fema.gov/Website/DFIRM_Viewer/Viewer.htm.	Supply
www.terraserver.com	The Terra Server maintains a subscription service for aerial photography. There are also links to other aerial photography providers	Supply
www.wetlandsfws.er.usgs.gov/wtlnds/viewer.htm	National Wetlands Inventory (NWI) can be accessed through the Federal Fish and Wildlife Service web site. The data can be view or downloaded from the viewer. Data can also be downloaded at the following site: www.wetlandsfws.er.usgs.gov/download.html.	Supply
www.oregon.gov/ODOT	Oregon Department of Transportation (ODOT), roadway maps can be accessed at the web site and through the Maps and Library link in the column at the left.	Supply

Web Site	Data Provided	Goal 9 Reference
www.census.gov	US Census data can be found here. Downloadable GIS data can be found through the Geography links and the tabular data can be found through the United States Census 2000 link.	Demand
www.oregonprospector.com	The Oregon Prospector web site provides access to a State-wide industrial land and building inventory. While the inventory of sites is in the early stages of development, this web site provides key commercial and industrial land/building supply data for "permit ready" sites in cities and counties throughout Oregon.	Supply
www.econ.state.or.us	The Economic and Community Development Department provides economic and community development and cultural enhancement throughout the state, and administers programs that assist businesses, communities and people. Oregon's economic development system is designed to meet the state's changing economy, provide flexibility in funding statewide and regional needs, and focus on funding economic and community development services for rural and distressed communities. Through the internet, we hope to provide information to browsers from both Oregon and worldwide. We want to provide you with useful, updated information at a low cost.	Demand
olmis.emp.state.or.us/	The Oregon Labor Market Information System (OLMIS) provides economic information to employers, job seekers, students, policy makers, analysts and others. It is designed to give users access to the Employment Department's information resources free of limitations due to time or location. It is part of the agency's effort to allow people to make informed decisions based on the best data available.	Demand
