

**TO: ALL USERS, COOPERATORS, RESEARCHERS, ETC. OF EXPERIMENTAL USE PESTICIDES**

**RE: EXPERIMENTAL USE OF PESTICIDES IN OREGON**

The following guidelines have been established to clarify registrations and permit requirements for experimental use pesticides (EUPs) in Oregon.

1. A state EUP is required if:
  - No Federal EUP has been granted
  - The proposed use entails applications to less than 10 acres of a crop or site not on the EPA registered product label.
2. All experimental use pesticides offered for sale in Oregon **MUST** be registered with this department prior to their distribution, sale or use.
3. You are required to notify this department **NO LESS THAN 72 HOURS PRIOR** to application of the product. Return of the approved form will provide documentation that this department was appropriately notified prior to experimental use of a pesticide.
4. If you plan on using a product that has **NOT** been granted a Federal EUP number from EPA, it may be used only on a **TOTAL of no more than 10 acres**. An application for an Oregon Experimental Use Permit **MUST** be submitted, and approved by this department, prior to the implementation of the experiment and application of the product. Upon approval, an Oregon EUP number will be assigned your specific product application. Submit a modification of this permit or apply for a separate permit prior to any variation from the uses described in this approved experimental use pesticide permit.
5. Oregon Experimental Use Permits will be valid for a period of one year from the date issued, unless otherwise specified.
6. Federal or State agencies are exempt from the requirement for an Oregon Experimental Use Permit. However, ODA must be pre-notified if a federal or state agency will be acting as a cooperator by applying a Federal (EPA) Experimental Use Pesticide.
7. Experiments and research carried out entirely in greenhouses are exempt from the requirement for an Oregon Experimental Use Permit.
8. Applicators of experimental pesticides must be appropriately licensed. Contact the ODA Pesticides Program at 503.986.4635 should you have questions on licensing.
9. A letter of support is required if the trial is being conducted by someone other than the employee of the pesticide registrant

# Oregon Experimental Use Pesticide (OEUP) Permit Application

Pesticides Program  
503.986.4635

Created 11/21

Complete the following information in regard to the experimental use of a pesticide in the State of Oregon. This authorization form must be submitted at least 30 days prior to intended use of the product. Departmental approval must be obtained prior to use. Failure to obtain approval is in violation of FIFRA Section 12(a) (2) (H). This permit is required for all State EUPs. **Please include product label and experiment protocol.**

State Official			Title		

Permit is contingent upon the conditions stated on the reverse side of form. Read and comply with all applicable regulations.

## Conditions of the EUP Permit

1. The person applying for this OEUP agrees to provide time and location of application to the Department of Agriculture Pesticide personnel **no less than 72 hours PRIOR to application time**. Call: 503.986.4635.
2. A state EUP permit must be obtained prior to ANY experimental pesticide use, except as exempted in (3). A federal EUP is additionally required if the proposed experimental application is to a total of 10 acres or more. A state EUP may be obtained without approval from EPA for experimental applications for a total of 10 acres.
3. Federal and State agencies conducting experimental pesticide use trials are exempt from the state EUP requirement. Experiments or research trials carried out entirely in greenhouses are also exempt from this requirement.
4. If this is a food/feed use and neither residue tolerance nor exemption from requirement of a tolerance has been established, crop destruction is required. An embargo will be placed on crop sprayed with EUP pesticide until crop is destroyed. **You must notify this office in advance and in writing, of the time, place and method of crop destruction.** If there is any possibility that residue could carry over into a subsequent food/feed crop, the subsequent crop must also be destroyed.
5. Any adverse human or animal health effects from this application must be reported immediately to the ODA Pesticides Division at (503) 986-4635.
6. Any adverse effects to the environment must be immediately reported to this office at .503.986.4635. All other concerned agencies must also be immediately notified.
7. Oregon Revised Statutes 634 stipulate regulations for pesticide use in Oregon including Experimental Use Permits (ORS 634.022). **All applicable laws and rules must be observed.**
8. The person and/or firm applying for this permit accepts all responsibility for the safe and legal use of this experimental pesticide.
9. Issuance of this permit does not negate the need for permission from other concerned agencies and departments.
10. The permittee is required to submit a final report upon conclusion of the program or at the expiration of the permit period. Briefly summarize the findings of the experimental trials under permit.
11. Disposal of all experimental pesticides and pesticide containers must be in accordance with 40 CFR part 165 and/or the disposal plan as approved in the experimental program. If the product is registered by EPA, then disposal must be in accordance with the product label directions.
12. All products which are used experimentally and are offered for sale to participators, cooperators, or anyone else, must currently be registered in the state of Oregon.
