Signature Page

This forest management plan describes the existing vegetation, soils, and wildlife/fisheries habitat and addresses the opportunities for the management and protection of all natural resources according to landowner objectives with no long-term adverse impacts. The forest management planning elements that have been checked are addressed. Planned actions are voluntary and subject to change. This plan does not limit or reduce any existing rights of the landowner. Carrying out the recommended actions contained in this plan will likely enhance long-term carbon storage through sustainable management of the land for forestry uses, even if short-term carbon storage capacity may be diminished by some actions.
