

Adaptive Management Program Committee

June 26, 2023

Attendance: Roll Call

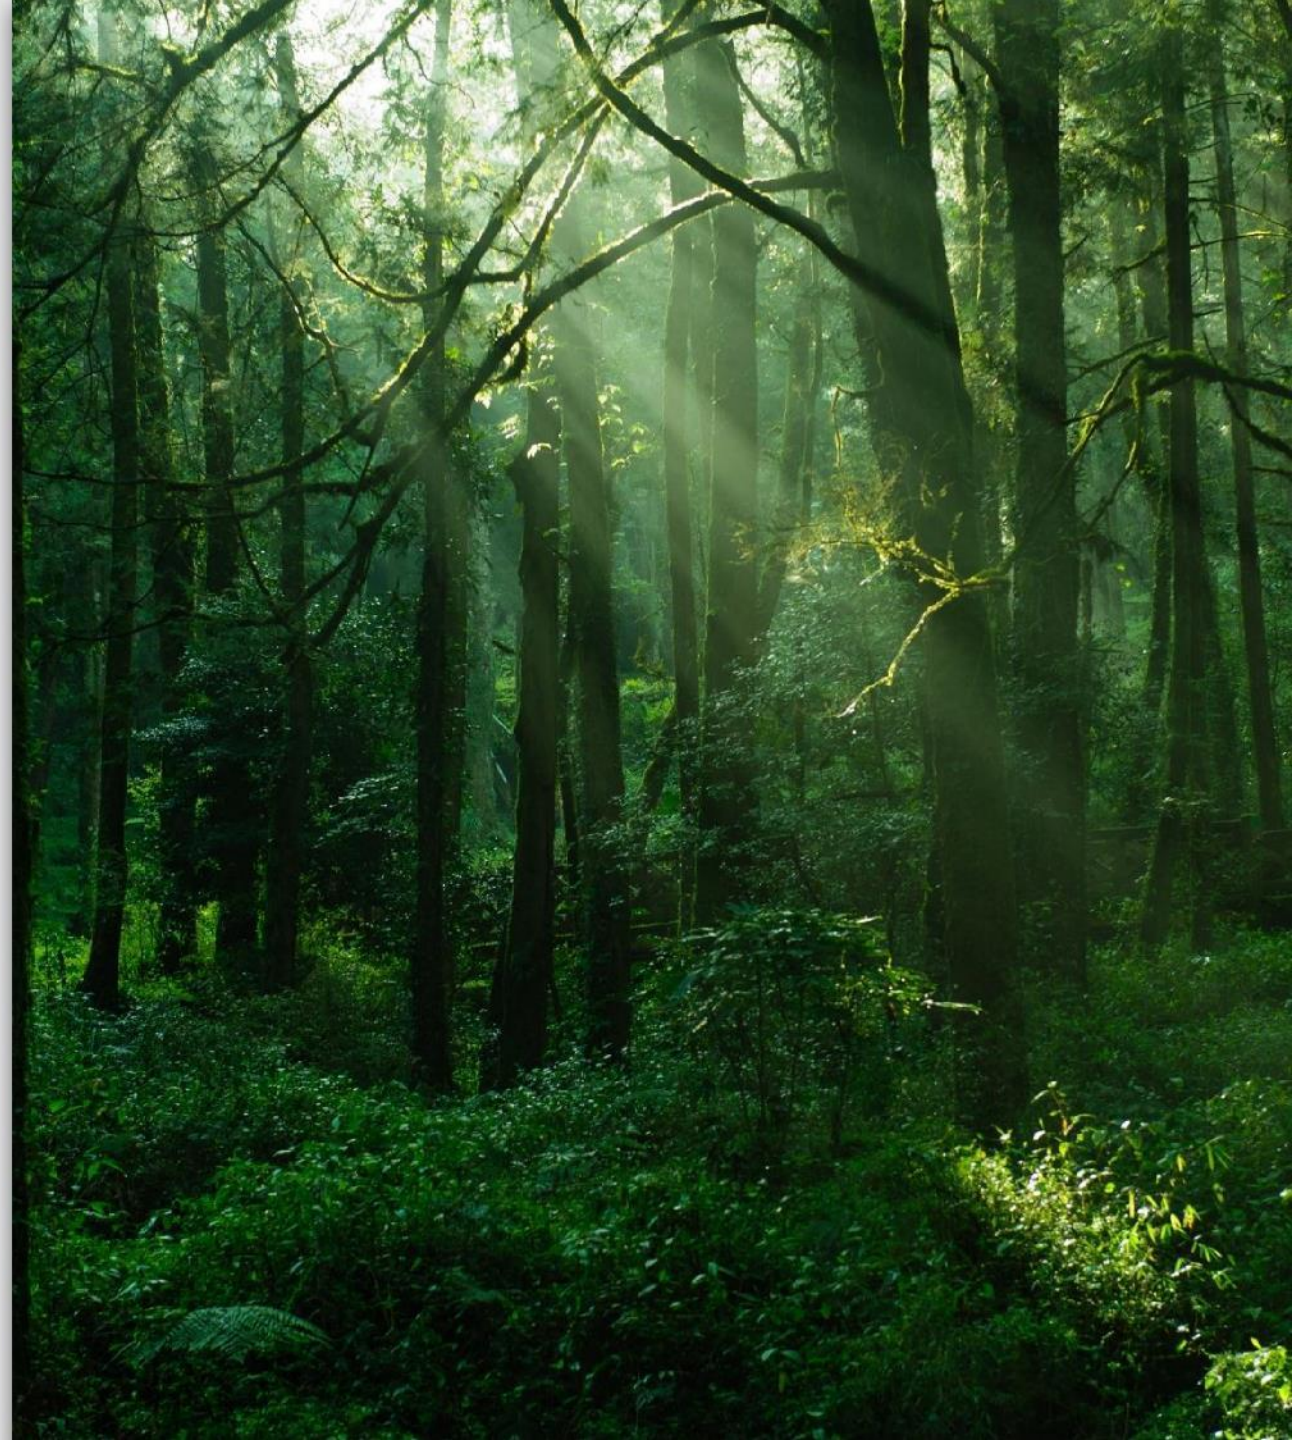

Please answer “Present (in person or virtually)”

Agenda

- I. Roll call, previous meeting
Exec Summary, updates,
public comment**
- II. Research topics**
- III. Field tour**

Housekeeping

- **Meetings are public & recorded (instead of minutes), available online;**
- **Side-conversations make it hard to hear on recording & virtually**
- **Online: please mute when not speaking**
- **Restrooms, exits**
- **Building doors lock**

Public Comment

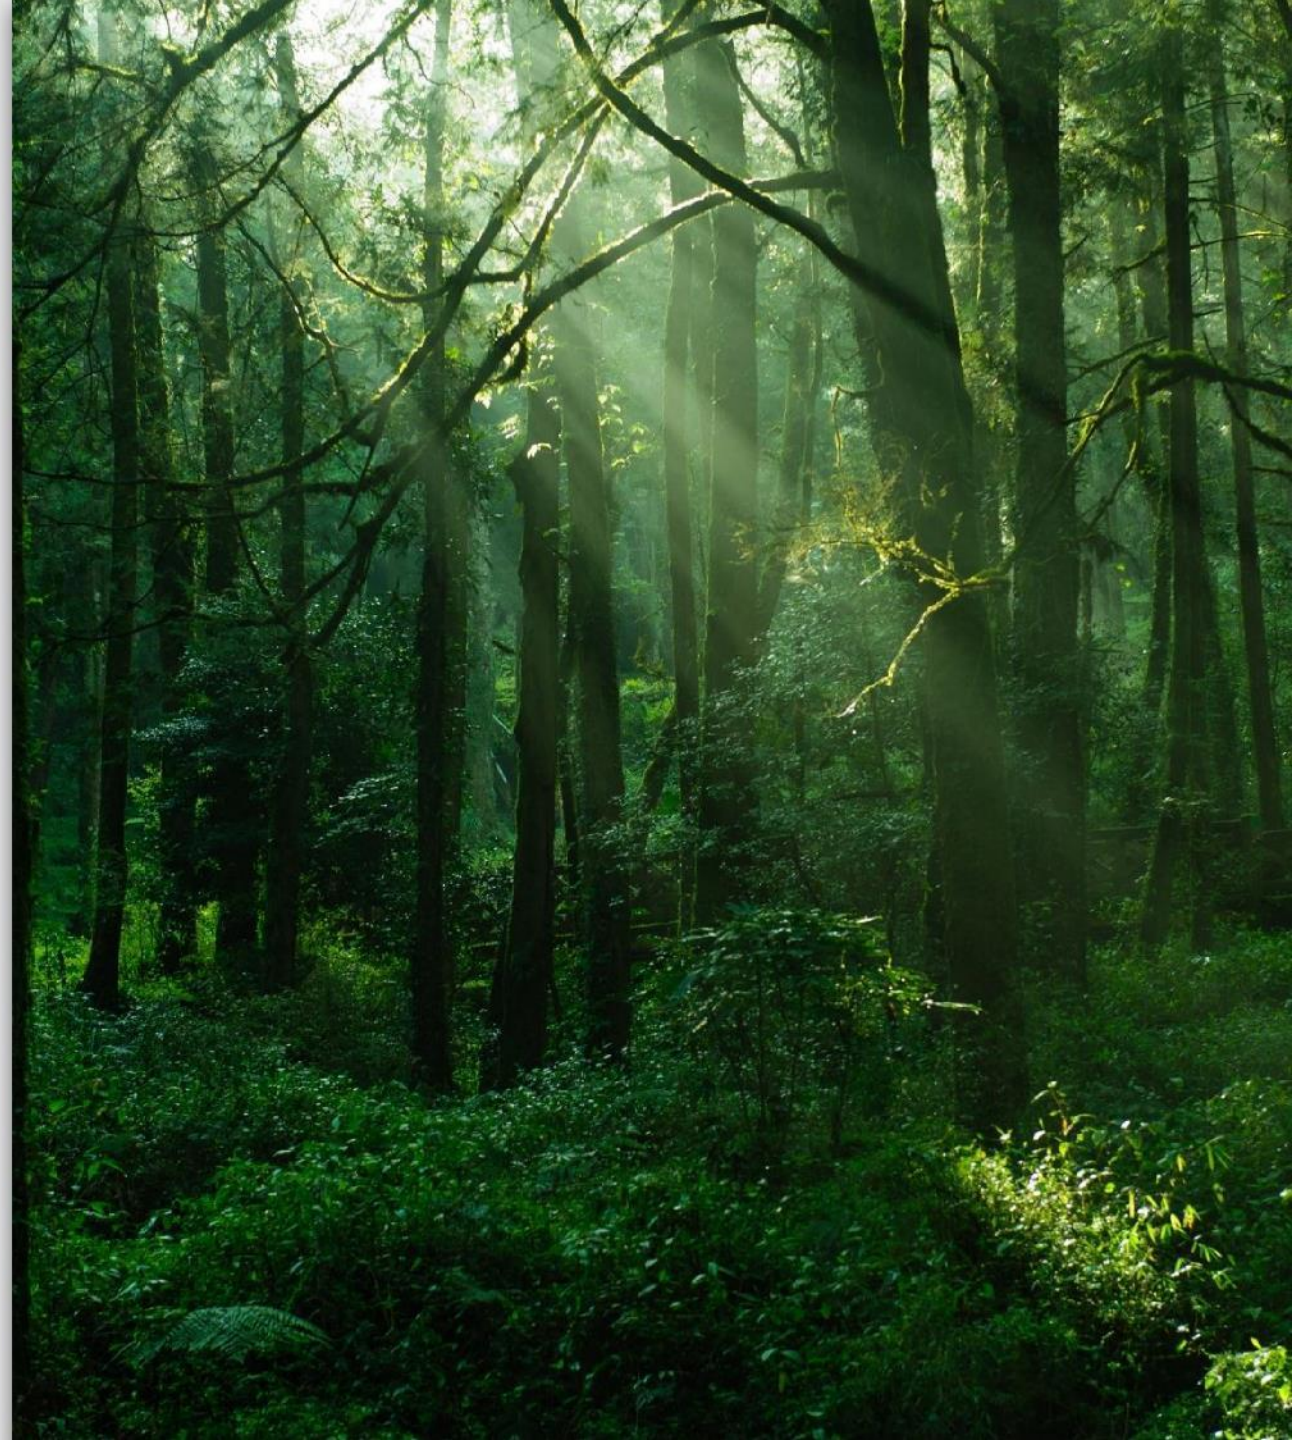

Executive Summary of previous meeting

Updates

- **Board approved IRST nominees**
- **Participation grants: \$2,000/month**
- **Legislature adjourned – AMP budget**
- **Potential joint meeting with IRST this fall**
- **Reminder: no July meeting**

Research topics

Research topics

Will refine process to organize, prioritize research topics regularly (e.g., annual or biennial)

Email Terry if additional research topics consideration later

Research topics

AMPC substantial decision: 3 or 3+?

- a) Literature review for eastern Oregon steep slopes;
 - b) Requirements of baseline and trend monitoring of road rules; and
 - c) Amphibians.
-
- 1) Effectiveness monitoring of riparian prescriptions for species habitat and species-relevant water quality parameters; and,
 - 2) Effectiveness monitoring of western Oregon steep slope rules for species habitat and species-relevant water quality parameters.

Research topics

August AMPC meeting: Refine road-related research question(s)

Field Tour: Road rules

Field Tour

- **Introductions (ODF staff, Starker)**
- **PFA at the district: Michael Curran, ODF Western Oregon**
- **Starker Forests: Randy Hereford, President and CEO**

We'll discuss more details at the sites (maps in your packet).

Field Tour: PFA Report

Baseline and Trend Monitoring for Hydrologic Disconnection:

- Monitoring methods based off of Dube et al. (2010) and Martin (2009).
- Purpose: to establish a baseline, & to monitor & report the change in hydrologic connectivity over time as the FRIA is implemented.
- The overarching goal is to ensure that all forest roads and landings shall be hydrologically disconnected to the maximum extent feasible from waters of the state. The AMPC shall use the results of this monitoring to develop regional goals consistent with that monitoring.

**Tour focus: start thinking about how to do this; examine fish passage.
(*NOT “are rules implemented correctly (compliance)?”*)**

Field Tour: logistics

- **Thanks for planning help:**
 - **ODF Western Oregon staff: Bill Mahr, Leo Williamson, and Michael Curran**
 - **Starker Forests: Jennifer Beathe, Randy Hereford**
 - **ODF Salem Staff: Paul Clements, Miriam Miller, Deanne Hicks, David Showalter, Greg Erb**
- **For loading into vans:**
 - **Grab your lunch (have extras if not place order), hardhat if didn't bring one**
 - **Bring your stuff – water, notes, etc.**
- **Last stop = end of convo, then return to Philomath (not re-convene AMPC in Philomath)**

**Thank you for your
participation today**
