

Analysis Procedure Manual

2022 Change Sheets

April 2022

APM Version 2

Full document

- Full APM download document updated to remove older PDF portfolio format. The document has been updated to reestablish the Table of Contents, opens on the cover page, has a smaller file size, and viewable in most web browsers directly instead of having to download first. The web page note has also been updated to reflect this.

May 2022

Chapter 2

Updating Section 2.3 for correct tools, moving documentation sections, and minor updates

- Section 2.3 was updated to remove obsolete analysis tools and add new tools since the last update of this section. The rest of the chapter had minor updates to bring to current such as removing out-of-date HCM references.
- The methodology memorandum section has been temporarily removed to be part of the in-progress Chapter 19 Documentation draft as it is a better fit. Appendix 2C has been renamed Appendix 19A. Appendix 2B (reviewer's scope checklist has been removed and the corresponding chapter text on analysis review will be part of Chapter 19.

June 2022

Chapter 3, 4, 6, 10 & 17

Updating various chapters and related appendices to the new OTMS count system

- Chapter 3 and Appendices 3B, 3C & 3E were updated to reflect ODOT's new OTMS traffic count database system from the older Traffic Count Management system and

related processes. This also included updating the Excel-based Planner Traffic Count Request Form tool.

- OTMS updates (mostly references) also extended into Appendix 4A, Chapter 6, 10, and Appendix 17A.
- Automatic count processing tools for models used in Appendix 17A were also updated to reflect the new count system.

Chapter 6

New Section 6.12.2 on Induced & Latent Demand

- A new Section 6.12.2 on Induced and Latent Demand was added to Chapter 6 replacing the short discussion on latent demand considerations.

November 2022

Chapter 3 & 5

Completing OTMS updates & AWD-ADT clarifications

- Appendix 3C and Chapter 5 had small updates regarding the OTMS Ranked Hour Report being sourced from archived Enterprise Data Warehouse data.
- Clarifications were added to Sections 5.5.1 and 5.5.2 regarding use of AWD or ADT for weekday or weekend trends.
