Fetal Death Reporting

Center for Health Statistics

Today's Agenda

- Definition of Fetal Death
- Requirements to Report (who, what, when)
- Collecting information using the Fetal Death Parent and Facility Worksheets
- Transporting Fetal Remains Disposition Permits

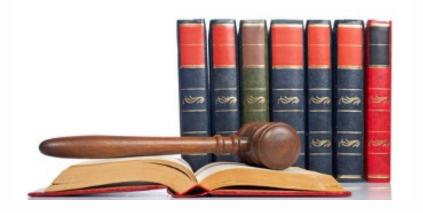

Legal Definition of Fetal Death

ORS 432.005 (14)

"Fetal death" means death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, that is not an induced termination of pregnancy. The death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of the voluntary muscles.

Key indicators of fetal death

Fetus is delivered without:

- a heart beat
- a breath
- umbilical cord pulsation
- voluntary movement

How is fetal death determined?

A medical determination must be made whether a delivery is a fetal death or a live birth.

Defined by law

- Fetal Death
 - No signs of life after extraction or expulsion ORS 432.005 (14)
 - Required to be reported *only* if the delivery weight is 350 grams or more, or 20 weeks gestation or more if delivery weight is unknown. ORS 432.143

What is *not* a fetal death?

If an infant is born showing signs of life but dies shortly thereafter

- Signs of life include
 - Heartbeat
 - Breath
 - Voluntary Movement
 - Pulsation of the Umbilical Cord

An Induced Termination of Pregnancy (ITOP) is NOT a fetal death

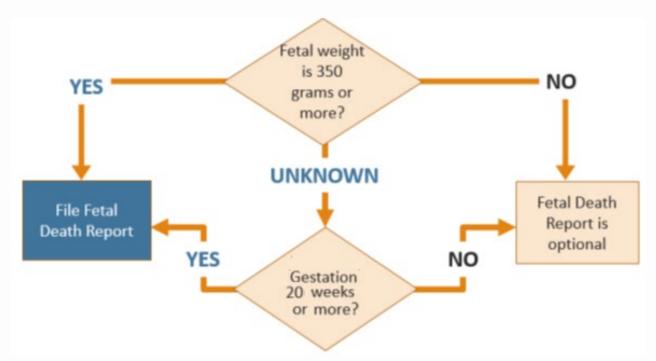

- ITOP is the purposeful interruption of pregnancy
- ITOP is required to be reported ORS 432.075

Fetal Death Reporting Requirements – What is mandatory to report?

- Weight of the fetus is 350 grams or more
- If the weight is unknown, then report if the gestation period is 20 weeks or more

Certificate of Stillbirth

- Certificates of Stillbirth are available to biological parents.
- A fetal death record is required.
- You may file a fetal death report even though the fetus does not meet the minimum mandatory reporting criteria if the parents want a commemorative Certificate of Stillbirth or a certified copy of the fetal death certificate.
- For Non-mandatory reports, it is necessary to complete the personal and medical information, including the delivery weight.

Reporting Requirements – When is a fetal death report required to be filed?

Mandatory reports of fetal deaths must be filed at the Center for Health Statistics within 5 days of the event. ORS 432.143

Reporting Requirements – Who is responsible for reporting?

- When a fetal death occurs in a hospital facility or other licensed facility, the hospital or facility staff is required to complete the report in OVERS.
- If the fetus is delivered outside a licensed facility, (at home for example), the fetal death report must be completed by the attending physician or a medical examiner.

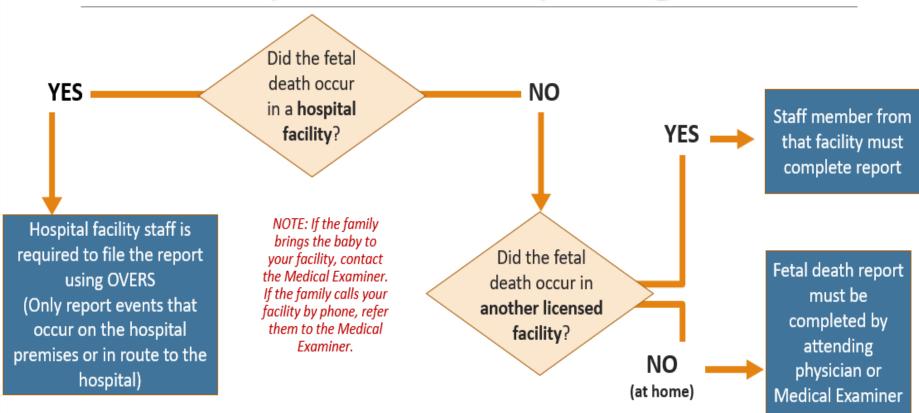

NOTE: If the family brings the fetus to your facility, contact the Medical Examiner.

If the family calls your facility by phone, refer them to the Medical Examiner.

Who is responsible for reporting?

Legal Definition of Live Birth

ORS 432.005 (21)

"Live birth" means the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, that, after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

How is live birth determined?

A medical determination must be made whether a delivery is a fetal death or a live birth.

Defined by law

- Live Birth
 - Signs of life, even if alive for only seconds ORS 432.005 (21)
 - Can be any gestational age

Key indicators of live birth

Baby is delivered with <u>any</u> of the following signs of life:

- a heart beat
- a breath
- umbilical cord pulsation
- voluntary movement

Live Birth with subsequent death

If an infant is born showing ANY signs of life, but then dies shortly after, this is a LIVE BIRTH.

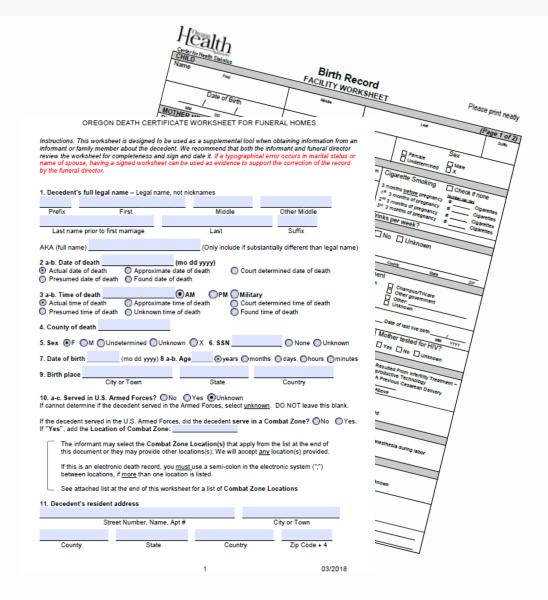

- Any live birth requires a birth report that will be entered into OVERS. ORS 432.088
- If the baby dies, a death report is required.
 - A funeral home generally begins the death report
 - This is <u>not</u> a fetal death

Important:

After delivery, if the fetus showed <u>any</u> signs of life, BOTH a report of live birth and a report of death are required.

Review Questions

- 1. A baby takes a few breaths after birth and then dies. Is this a fetal death? Why or why not?
- 2. When is a fetal death report required to be filed?
- 3. What are some of the signs of life used to determine if a fetal death has occurred?
- 4. A fetus was delivered at 18 weeks with no signs of life and weighs 320 grams. Is a fetal death report required?

Worksheets on our Website

Fetal Death Parent & Facility Worksheets

Birth Parent & Facility Worksheets

Transporting Fetal Remains – What is needed?

- Before the fetal remains can be removed from the facility where the delivery occurred, the facility must complete a fetal death disposition permit and give it to the funeral director or parents when they take the remains. This is required even if a fetal report is *not* filed.
- The disposition permit gives permission to transport remains to the location of burial or cremation.

Transporting Fetal Remains

Fetal Death Disposition and Transit Permit

- Used only for a fetal death
- Disposition permit can be completed by birth information specialist
- Auto-populated form in OVERS if a report is filed.
- Print blank form if no report is filed.
- Not required if fetal remains are disposed of at the delivery facility
 - Fetal remains must be treated as medical waste.

Transporting Fetal Remains

Review Questions

- 1. A fetus is being removed from the delivery facility. No fetal death report is filed. Is a Fetal Death Disposition Permit required?
- 2. Who can complete the Fetal Death Disposition Permit?
- 3. How are fetal remains disposed of if parents decide to leave the fetal remains at the hospital?
- 4. A baby was born and then dies after taking several breaths. Should a Fetal Death Disposition and Transit Permit be given to the parents?

Q & A

Thank you!
