¹Pregnancies include resident births and occurrence abortions, but exclude fetal deaths and spontaneous abortions.

²Oregon residence figures for births (includes 15-44 year old females only).

³Oregon occurrence figures for abortions (includes 15-44 and unknown age females).

All rates per 1,000 population of 15-44 year old females. 2002: 740,268

**Table 3-2. Live Births and Induced Abortions
Occurring in Oregon, 1968-2002**

Year	Births	Induced Abortions

2001	46,200	14,272	308.9
2002	46,053	13,172	286.0

* The increase in the 1980 figure reflects improved reporting rather than an increase in the number of abortions performed. Approximately 1,000-1,400 of the abortions were performed by providers who did not participate in the voluntary abortion reporting system prior to 1980 even though they were performing abortions in previous years.

**The increase in the 1984 figure is probably a consequence of the implementation of ORS 435.496, which requires that an induced termination of pregnancy report be filed by abortion providers whenever an induced abortion is performed.

NOTE: Induced abortion ratio is the number of abortions per 1,000 live births.
