1 Pregnancies include resident births and occurrence abortions, but exclude fetal deaths and spontaneous abortions.

2 Oregon residence figures for births (includes 15-44-year-old females only).

3 Oregon occurrence figures for abortions (includes 15-44 and unknown age females).

Note: ORS 435.496 was implemented in 1984 requiring all providers of abortion to file a report of induced termination of pregnancy for each abortion performed. Rates per 1,000 females 15-44 years of age. 2006: 741,050.

\* The increase in the 1980 figure reflects improved reporting rather than an increase in the number of abortions performed. Approximately 1,000-1,400 of the abortions were performed by providers who did not participate in the voluntary abortion reporting system prior to 1980 even though they were performing abortions in previous years.

\*\*The increase in the 1984 figure is probably a consequence of the implementation of ORS 435.496, which requires that an induced termination of pregnancy report be filed by abortion providers whenever an induced abortion is performed.

NOTE: Induced abortion ratio is the number of abortions per 1,000 live births.
