¹ Pregnancies include resident births and occurrence abortions, but exclude fetal deaths and spontaneous abortions.

² Oregon residence, figures for births (includes 15-44 year-old females only).

³ Oregon occurrence, figures for abortions (includes 15-44 and unknown age females).

Note: ORS 435.496 was implemented in 1984, requiring all providers of abortion to file a report of induced termination of pregnancy for each abortion performed. Rates per 1,000 females 15-44 years of age.

Table 3-2. Live births and induced abortions occurring in Oregon, 1976-2015

Year	Births	Induced abortions	
		Number	Ratio
1976	35,612	12,590	353.5
1977	38,448	13,163	342.4

2010	45,904	9,990	217.6
2011	45,136	9,567	212.0
2012	45,566	9,016	197.9
2013	45,591	8,287	181.8
2014	46,100	8,231	178.5
2015	46,102	8,610	186.8

* The increase in the 1980 total reflects improved reporting rather than an increase in the number of abortions performed. Approximately 1,000-1,400 of the abortions were performed by providers who did not participate in the voluntary abortion reporting system prior to 1980 even though they performed abortions in previous years.

**The increase in the 1984 total is probably a consequence of the implementation of ORS 435.496, which requires that an induced termination of pregnancy report be filed by abortion providers whenever an induced abortion is performed.

NOTE: Induced abortion ratio is the number of abortions per 1,000 live births.
