Questions

- Has anyone in your family had cancer?
- What type of cancer?
- How old were they when they were diagnosed?
- Are they still living? If not, at what age did they die and what caused their death?
- Have you ever collected or written down your family history of cancer?
- Have you ever discussed with your doctor what your family history of cancer could mean for your own health?
- What is your family's ancestry?
 - Do you have ancestors from other countries? If so, which country or region?
 - For relatives who have died, be sure to ask about cause and age of death.
