Subject: Annual Call for Data – Oregon Watershed Restoration Inventory (OWRI)

Oregonians have made significant investments in projects designed to benefit fish and wildlife and their habitats. These voluntary actions to improve watershed health are an important part of the Oregon Plan for Salmon and Watersheds and other conservation efforts.

Since 1997, the Oregon Watershed Restoration Inventory (OWRI), managed by the Oregon Watershed Enhancement Board (OWEB), has been tracking information about completed restoration projects. This data resource helps us to tell our state's restoration story across landownerships and various activity types.

Please consider adding your projects to OWRI during this Annual Call for Data. Specifically, we seek voluntary reporting of projects not funded with OWEB grants. Examples include projects implemented by private forest landowners, state forests, tribes, state parks, conservation groups or county/city/state agency-led programs.

Report projects completed in 2023 (or earlier) through [OWRI Online](#) (OWRIO) by **March 31, 2024**. Contact project partners or OWRI staff if unsure whether a project was reported.

Thank you for supporting the Restoration Inventory!
