Background

State Forests are sustainably managed to provide social, economic, and environmental benefits to all Oregonians. In October of 2020, the Board of Forestry (BOF) directed the State Forests Division to begin the National Environmental Policy Act (NEPA) process for the draft Western Oregon State Forests Habitat Conservation Plan (HCP) and continue developing an associated Forest Management Plan (FMP). These parallel planning processes have been closely coordinated to ensure alignment and consistency in management goals, objectives, and strategies. ODF recognizes that public engagement is a key element in developing an HCP and FMP that reflect the values of all Oregonians, and is committed to providing information and engaging in dialogue with those who have an interest in these important planning efforts.

Meeting Purpose

- Learn about the FMP development process
- Hear updates on the Western Oregon State Forests HCP
- Hear updates on the HCP NEPA process
